Maps And Geography (Ken Jennings' Junior Genius Guides)

Synopsis

Discover the fun facts about the world and become a master of geography with this interactive trivia book from Jeopardy! champ and New York Times bestselling author Ken Jennings. With this Junior Genius Guide to maps and geography, you'll become an expert and wow your friends and teachers with clever facts: Did you know that the biggest desert in the world is actually covered in snow? Or that Christopher Columbus wasn't the first to think that the Earth was round? With great illustrations, cool trivia, and fun quizzes to test your knowledge, this guide will have you on your way to whiz-kid status in no time!

Product Dimensions: 5 x 0.6 x 7.5 inches

Shipping Weight: 8.5 ounces (View shipping rates and policies)

Average Customer Review: 4.6 out of 5 stars [See all reviews](#) (37 customer reviews)

Best Sellers Rank: #365,006 in Books (See Top 100 in Books) #145 in [Books > Children's Books > Education & Reference > History > Exploration & Discovery](#) #163 in [Books > Children's Books > Science, Nature & How It Works > Mystery & Wonders](#) #93514 in [Books > Reference](#)

Age Range: 8 - 10 years

Grade Level: 3 - 5

Customer Reviews

This arrived yesterday and my 9 year old son grabbed it and was reading it in bed when I went to tuck him in. He informed me that it wasn't Columbus who discovered the world was round--folks had figured that out long before, and it was Eratosthenes who, in the third century BC, calculated the circumference of the Earth within a few percentage points of the truth, extrapolating based on the length of shadows in different cities. Holy crap--I was smarter already, and I haven't even read the book. Anyway, it's well laid out for a younger reader, contains fascinating information, and appears to go well beyond "trivia" to prompt thought including but not limited to scientific analysis, critical

reasoning, and maybe even the value of mathematics. Not that your child should be aware of that unless you're a Tiger mom and are hitting them over the head with the "get ready for Harvard" mantra--normal folks can just take some delight that they're sneaking it all in via a fun read. Nice work, Ken Jennings!

My seven year old is eating these up, she wont put them down for anything. She is taking the oath very seriously :)

A really fun book. My son is learning so much, and so am I! The coded key for answers is great. My son came up with his own little code after reading it. It's written in a very engaging way. These books should be required in elementary classrooms.

Our grandson, 10 years old, read this book and learned a lot. He asked questions such as, What president had no formal education? How many presidents are still alive? How many presidents were killed in office? We were impressed.

Love these books! Read to my 8 year old. There are definitely some concepts above his knowledge level but love all the stories and knowledge gained from reading this. Ken Jennings shares insight along the way with facts. He adds humorous and quirky stories that would hold a child's interest. Love these books.

Granddaughter loved it...glad she was challenged and willing to read., she told me she enjoyed it and was glad I bought for her..Mike

Another amazing read for my ESL tutee and me. The Junior Genius Guide on MAPS AND GEOGRAPHY is fascinating and funny: a combination that makes reading fun. Diego will really enjoy this book about the wonderful places around the world and its fascinating landmarks. There is a section on the United States and oddly-named towns in it. Diego will laugh when he reads that part. This is a great book to interest a child on geography and keep him interested.

Written for middle school and junior high students, but interesting for adults with the facts given. An easy read.
