This is a supplement to our homeschool history class. It has great information and very colorful and interesting pictures. The only drawback is that the drawn portraits tend to all look alike and not quite as accurate as they should be. Otherwise, great for all ages, but some may need help with the reading depending on their age and skill. It's better than Usborne's world history and less problematic with the pictures.

I am not a big specialist in world history, but I know well my own (Russian) history. I was surprised with the content selection for the encyclopedia. Not the best choice and always something about terrible Russian winter. "And then Napoleon came but could not stand the Russian winter"... Or "Then Hitler came but could not stand the Russian winter"... Russian soldiers in the fields of course can stand Russian winters. They are covered in fur, like polar bears, so the Russian winter does not scare them at all. And with all the possibilities they could come up in case of Catherine the Great (the Great, it means something) they chose to illustrate... with the poverty of peasants. Great! They could not even research a Russian folk costume and dressed a man in a long shirt with no pants (in the snow, during the terrible Russian winter) and a German-looking hat...Really, I cannot trust the with the history of other countries, when I know that they did such a bad job with mine.

Definitely an encyclopedia rather than a textbook. Each page has a timeline at the top so as you skip around the book, you can keep track of what century you are reading about. The illustrations are excellent, appropriate, and there are plenty of them on each page to keep the book interesting to read as well as flip through. It's written on a 3rd grade reading level, but comprehension is more like 6th grade and up. As a homeschool mom, I love this as a resource in our library of books.

There simply is almost nothing new in this edition! Not worth getting the updated edition IF you have the previous version.

If you're a classical educator or are using Susan Wise Bauer's "Story of the World," this is a must-have addition to your school library. It has full-color, fascinating 2-page spreads on ancient thru current historical periods, covering life, culture, leaders, conflicts and other portions of civilizations. This will add a lot of color to your lesson plans!

We purchased this book to go along with our son's homeschool program. I am a huge fan of the Internet, but we wanted him to hav experience in finding information in an actual book, rather than

only searching virtually. The pictures, illustrations, and text are well done and we are very happy with it.

As a homeschool parent, I'm always on the hunt for new books that my kids will willingly sit-down and read. This Kingfisher history book meets that need...my kids BEG to read this book and to do copy work out of it. It has wonderful illustrations and the text is written at just the right level for their needs. We find the Kingfisher books not to be so visually overwhelming as the Usborne books...and at a better price.

The best homeschool reference all in one that anyone could have on their shelves! We have found times, people, places, that our family doesn't even remember learning and is not in typical history books. This is packed and ready for families to use information here to find links on the web, books in libraries, etc to further what they are learning about!
