Customer Reviews

I have read all of Catherine Ponder's books and cannot recommend them highly enough. She is the ONLY author in this genre who provides new insights and new techniques in each and every one of her books. (Other authors recycle the same idea in different clothing--not Ponder.) Her books are especially rich and useful because she provides both techniques that work and the knowledge that explains why they work and how and when to apply them.

The author shares the spiritual laws of healing and deals with the causes of emotional and physical problems. She shows one how to turn on the corrective thoughts in order to change the whole

pattern of your life for the better. It is explained that everybody can use these ancient healing laws and there's nothing mysterious about them. In fact, healing constantly takes place in our lives in simple ways that seem miraculous. We all have the healing power, if we only realize it. The healing laws include: The "No" law, "Surprise" law, Law of Release, the "Yes" law, Praise law, Law of love, Miracle law, Occult law, Imaging law & the Mystical law. Countless examples of healing are provided to demonstrate these laws in action. A pleasure to read and a book that substantially expands one's consciousness. Should be on every healer's bookshelf.

I first read this 2 years ago. Since then, I have read many of her other books as well as one from Florence Scovell Shinn. I am not the same person I was then. You can completely change your experience of life by reading this book. Your thoughts and words are a form of energy and can be used to create the life you want for yourself.

This book came back to me a few days away in my mind because I probably read this book over 10 years ago, it was given to me by a very close friend whom I look at to as a second mother and at the time she let me read the book, I was not in any pain or had any health problems. She was reading Ponder's book on Prosperity and let me read this one. Well needless to say, another disguised Blessing was in the making because even though I was not sick and usually if you are not going through sickness, people would probably not think to read this book. **WRONG!** There was a message in the book just for me. I recall reading the section about the Power of Release and at the time I was in a 10 year relationship that I didn't know how to get out of. I felt trapped because he was emotionally abusing me, I was scared that if I left he was going to cause me problems. There was an affirmation in the Release section of Ponder's book that went like this "I fully and freely release _____ out of my life, I loose and let go and let God and know that he has already answered my prayers". I took to heart this affirmation and repeated this affirmation for several months believing in my heart that God would release this person from my life **FULLY AND FREELY** and behold a year later I was able to walk away from that relationship without a fear in my heart and when I said I was done, I was done. I know that me reading this book and believing in this affirmation is what allowed me to be able to do it. So I say this, listen to your spirit and God does use people to Bless us and to get messages across to us when we least expect it. Never would I have thought to buy a book about Healing when I am perfectly healthy, this is another example about how God works in our lives.

One's health is a most important asset. In this excellent book Catherine Ponder presents the techniques to keep one's health or to recover one's health. They include calling on Jesus when one is in need, imagery, tithing and other excellent advice. The book analyzes the metaphysical-ultimate-causes of illness, and their cure. A wonderful and intelligent book.

This book has changed my life. I highly recommend it to everyone. The relationship between the mind and healing is explained so clearly that the theories are very easy to apply. This information can be applied to all facets of life. I continually refer back to this book for wisdom on dealing with problems. If you read it, it will change you.

Having discovered I had cancer at end 2005 this book has helped me to stay focused and has also helped my recovery (my specialist has said I am doing exceptionally well. I fully recommend this book for everyone it has answered a lot of my questions and more.

This is must reading for anyone desiring a guided tour of the body-mind connection. Actually, the 'spirit' enters into the picture as the third component of human experience. Dr. Ponder's books are very easy to read and understand. For the non-believers--just keep an open mind and try it! Catherine Ponder flavors all her books with many concrete examples and adds the ingredient of humor which makes for an enjoyable read.
