# Photosynthesis (Science Concepts Second)

## Synopsis

Explains photosynthesis, the process responsible for providing the material and energy for all living things, and discusses such related issues as respiration, the carbon cycle, acid rain, and the greenhouse effect. --This text refers to an out of print or unavailable edition of this title.

## Book Information

Series: Science Concepts Second

Library Binding: 80 pages

Publisher: Twenty-First Century Books (CT); Revised edition (October 1, 2007)

Language: English

ISBN-10: 0822567989

ISBN-13: 978-0822567981

Product Dimensions: 8.6 x 6.4 x 0.4 inches

Shipping Weight: 11.2 ounces

Average Customer Review: 5.0 out of 5 stars [See all reviews](#) (5 customer reviews)

Best Sellers Rank: #701,447 in Books (See Top 100 in Books) #103 in [Books > Children's Books > Education & Reference > Science Studies > Chemistry](#) #137 in [Books > Children's Books > Education & Reference > Science Studies > Botany](#) #8582 in [Books > Children's Books > Science, Nature & How It Works](#)

Age Range: 10 and up

Grade Level: 5 and up

## Customer Reviews

Very readable introduction to photosynthesis. Includes some great facts like a single maple tree can produce 2 tons of food (sugar) in one sunny day. Could use some illustrations (e.g. cell anatomy and xylem and phloem, but photos are good. Includes a glossary, additional resource list, and index. Karen Woodworth-Roman, [Children's Science Book Review](#)

I bought this book for my daughter and "we" both like this book a lot. There are a lot of diagrams/pictures and it is a book she has used as a reference book for school on several occasions. It's great to have on the bookshelf for any child - if you are attempting to foster an inquisitive mind and help them understand aspects of our wonderful world.

A great little book in my opinion. After DNA, the most important concept in biology, but my daughter

did not appreciate it. Maybe next year. So I just ordered some owl pellets for her to dissect.

It is so neat to read HOW the science developed, for instance that a mint sprig in a jar enabled a candle to burn longer.

Great textbook at a child's level
