# Smart Kids Space

## Synopsis

Open your eyes to a world of discovery with this amazing fact-packed book. From the Solar System to the Milky Way, from Mars to Mercury, from UFOs to the Space Shuttle, Space is an ideal first guide to the mysteries and wonders of our incredible universe. Written in an accessible and fun style, the informative text is perfectly complemented by visually stunning, large-sized, full-color photography. Perfect book to introduce children aged three and over to the fascinating world above us.

Age Range: 4 - 7 years

Grade Level: Preschool - 2

## Customer Reviews

This is the third Smart Kids book I have purchased for my son and we are so happy with them. The pictures are awesome and they have so much information. We will be learning from these for a long time!

I bought this for my 3-year-old daughter who currently loves all things space and rockets. The pictures are beautiful and the book has held up well to some heavy use, even clumsy page turning and carrying by my 18-month-old. There's a lot of neat information, and you can easily pare it down for younger children or read it all for older ones.

This book says it's good for 5+, but my son, who started to show an interest in space when he was 2-almost-3, LOVES it. He's almost 4 now and still enjoys reading it almost every day. There is one very annoying typo (humans is misspelled on one page) but other than that it is a good and informative book. When I read it to my son I don't read everything on every page. So the next time, I can read the things I didn't read the last time. It has a lot of information, but has helped my son memorize the order of the planets, and learn facts about each planet. It also talks about nebulas, craters, space tourism, and of course space shuttles and rockets. In the back of the book is a timeline of space related events and the final pages include definitions of things mentioned in the book. I highly recommend this book. It's fun for both of us to read. It has nice, bright photos and is large - but not too big. All in all a wonderful book for any kid!

My 3 1/2 year old loves this book and wants to read it every night! Each page tells facts about the sun and each planet. It also describes things associated with space such as space shuttle, astronauts, stars, etc. He has learned so much from this book! I would definitely recommend if your little one loves space!

My four year old thinks this book is awesome. The layout is easy to follow and the language is age appropriate. The pictures are beautiful too. The quality is great and is definitely holding up to my two young ins.

My son is obsessed with space and this book is one of his favorites. He absolutely loves it! I would definitely recommend it for any other space loving kids out there. Very informative, great pictures, easy to read layout. Love it.

We love the Smart Kids series and were very eager for the Space book to come out. My 5 year old even counted down the days till its release. Very please, once again, with another book in this series.

This book is fantastic! The pictures are gorgeous and bright, and the print is nice and large for younger readers. It provides a lot of information, and covers many topics...not just planets! There's also a glossary in the back to review terminology used elsewhere in the book. I can easily see this as a must have for an elementary school classroom! And the price is great for such a well-made book.
