## Customer Reviews

We are a homeschooling family and have found this to be a good resource to accompany our U.S.

History learning. It contains a lot of information and has great visuals and has kept my 9 year old son interested without getting bogged down.

Checked this book out of the library several times, and finally thought we should own a copy. We use it for our geography and mapping unit study. Have also gone on- line for the extras. It's a beautiful book.

A good reference for our homeschool! The maps, photos, and facts are very well laid out and interesting. Easy for even the youngest to get a gauge of where they are in the country, but also good as they grow up. Recommended highly.

We gave this as a Christmas present to our precocious 7yo granddaughter. She promptly devoured this atlas, learning all the state capitols in the process (plus other state facts). What a surprise to the adults in her life! The book is well written and illustrated, and hard for anyone to put down once opened. A good choice for omnivorous early readers!

purchased as gift for grand child at request of my daughter. The maps and pictures are beautiful and there is a lot of information. I agree with earlier recommendations that it would be a great resource for homeschooling, I am a retired teacher who would have loved to have this in my classroom.

I purchased this National Geographic Atlas as a birthday gift for my grandson who is 8 years old and in second grade. He is interested in where states are and information regarding these states. He loves the Atlas and has decided to do a school project using it. The maps are wonderful and it gives so much information regarding each state. Hopefully, he will be able to use this book for a long time. It is age appropriate for an 8-year-old and up.

This is a great atlas for young kids. The layouts are bright and shiny and it does not lack for information just because it is a kid level Atlas. I actually used it in writing a Kids book that involved a Pack of Coyotes traveling across the USA. Nice book.

We bought this Atlas to help with our homeschooling geography for my 7 year old who is in 2nd grade. This Atlas is fantastic! It is detailed and informative, however not too overwhelming to tackle

with a 2nd grader. The pictures are high quality, and there are plenty of fun and interesting facts about the states!
