## Customer Reviews

Illustrated with full-color photographs on every page, *The World Almanac for Kids 2008* is a completely updated, fact-filled reference and resource covering topics from animals to science to branches of government, sports, American history, and popular culture. The eye-catching layouts, jazzed up from page to page, make *The World Almanac for Kids 2008* fun to browse through as well as being educational, and an index allows for quick reference. Highly recommended for grade school library and children's reference shelves.

My son loves looking at books that show things that were popular or record breaking the year he was born. I've been looking for this one for a quite a while. It's got great pictures and has things in it kids are really interested in. The book was in perfect condition!

I bought this for my eager-to-learn niece because her grandpa reads the adult almanac all the time. It has 1-4 page sections on the same topics as the world almanac. Difference: it's in full-color displays like magazine pages. Very inviting and has the crucial info that a kid might want to use to answer questions such as "What's the capital of Tupalu?" Frankly, all the adults picked it up to flip through, too, because it draws in the reader. The reading/interest level is probably middle-to-late middle school.

This book and Scholastic's book of world Records are favorites. This book is more "busy" and jam packed with facts whereas Scholastic World Records is more basic and easier to read for a younger child. I got this world almanac for something different but my son wished I had gotten a newer World Records so he could compare his older version with a newer one.Â Scholastic Book Of World Records 2008 (Scholastic Book of World Records)

I highly recommend this book. I have bought the world almanac for kids 4 years in a row and it is by far the most used book in the house. I have bought multiple copies for gifts as well each year and think every child should have one. It is full of fun, information and facts and is great for bedtime reading....

This is a great book for curious minds. I bought this for both my boys 8 and 5 and they love the facts and behind the science information that they can read about. It is very colorful and keeps the attention for long periods of time. Quality book for long road trips and learn at the same time.

I bought this almanac as a gift for my 8.5-year-old granddaughter for Christmas, one of a dozen packages, and the least expensive. This is what she was most interested in. She read off-and-on for the next 3 to 4 hours that she was spent with me. Great!

I bought this as a Christmas gift for my 9 year old nephew. He loved it! not only does it educate the kids but it's fun reading.
