Customer Reviews

My children love Insiders. The graphics are wonderful. They are fun books and informative. The only drawback I have is in every nature book in Insiders humans are bad and the cause of all problems. Meh. Annoying, yes, but I'd still buy them; I just let the kiddos know about real science versus baloney-theories. If this is something that would annoy you or cause you to reconsider, it is pretty pervasive in the series. However, if you can get past that everything else about this series and this book, Oceans, is fantastic. The descriptions and illustrations capture the imagination. My son

especially likes the angler fish and dark zone portions.

The book is in very good conditions only one small scratch at two corners but everything else is perfect, We are very pleased with the service and we got what we expected. I recomend this site and will buy again from them. Thank you for contacting me. Maggie
