# The Dinosaur Museum: An Unforgettable, Interactive Virtual Tour Through Dinosaur History

## Synopsis

Young, eager paleontologists wanted. Apply within. We need YOUR expertise! So step inside The Dinosaur Museum, the book where kids get to act like paleontologists. This amazing volume gives readers a behind-the-scenes peek at a museum, with an interactive experience that evokes a visit to a natural history museum. Forget about waiting in long lines for hours. This interactive guide takes you on a room-by-room tour of the most fun-packed museum you can imagine. Learning about prehistoric monsters becomes a practical challenge to the scientist in every reader. Each room points to a range of interactive investigations that can be carried out in the dino-lab gatefold flap. You can open the specimen drawer filled with fossils, look at specimen slides through the microscope, and use a whole host of interactive features: a pop-up fossil finds map, a dinosaur time line, and a sliding chart that allows you to compare the size of dinosaurs with modern animals. Dinosaur Museum is the ultimate holiday gift for every child who loves dinosaurs. This inspiring interactive book gives children the chance to experience the real science behind the study of one of the most exciting eras in the history of the Earth.

Age Range: 6 - 9 years

Grade Level: 1 - 4

## Customer Reviews

I bought this book for my 3 year old and I'm thrilled because I love to look at it. The first page has a dino lab with useful information about size, fossil formations, and plants. There are 2 drawers (flaps)

you pull out and see actual fossils of a Velociraptor's claw, Triceratops brow horn, etc. And a scale chart (with the name, height, length and weight of several dinosaurs) so you can see how huge these dinosaurs were in comparison to human beings. There's really too much to list but you will see that for yourself after you get the book. From the beginning, you are taken back and educated about the many different dinosaurs: The Plant - Eaters, Gentle Giants, Small but Deadly (Oviraptor, Troodon, Deinonychus, etc.), Suits of Armor ((Ankylosaurus, Triceratops, Stegasaurus,) The Meat Eaters, and The Flying Reptiles. It's so wonderful because it gives you detailed information on each dinosaur, the meaning of the names, how to pronounce it, etc. And the Pop-ups are wonderful! You feel like a big kid (for us grown-ups) going through this wonderful book, pulling and lifting flaps, discovering more tidbits and facts. It's very exciting and the children love it. You also learn about the Triassic, Jurassic, and Cretaceous period as well. My son loves this book but I love it, more. I highly recommend this book for kids and grown-ups alike. It's a wonderful educational resource with great pictures and pop-ups, everyone is sure to enjoy The Dinosaur Museum. Welcome!

beautiful pictures, great information, well done pop-ups - my grandson who is 4 loved it and his father who is 43 loved it more

We purchased this as a gift for a 5 year old boy. My daughter (4) and I looked through it before we wrapped it up for him. It is really fun with great pictures, pull-outs and pop-ups. The information is easy for kiddos to take in and interesting for adults as well. Perfect for any age, but best suited to the 5-12 crowd. I will be buying another copy for us in the future.

When I received this book I was blown away by how cool it looks! It was a purchase for my 5 year old son, but I am 32 years old and enjoying it just as much. The book is very informative but also really fun and entertaining. The pop-ups are super cool and detailed. Everything is made very sturdy...nothing like the pop-up books that tear right away. All of the dinosaur names have pronunciations next to them, size comparisons, the meaning of their names, what they are known for, etc. This book is perfect for any dinosaur fan!

Bought this for my 9 year old son's birthday. He absolutely loves it. Even 2 months later, this is his go to book. He loves feeling like he is in the lab or out in the field studying the different aspects of the dinosaurs.

We purchased "The Dinosaur Museum" as a gift for a 10 years old boy who likes to read. We did not expect to be the type of book it was but proved so interesting the we had to read and view from cover to cover. It is very impressive how the book actually come alive as you turn the page. We had no idea at the variety of the species in the pre-historic era. Highly recommend for young people who want to gain knowledge.

Not too technical, but informational in an easy to understand format. I purchased this book for my 5 year old grandson, and found myself reading and exploring the book for days before I gave it to him!!!!

I was actually looking for more pop-up action. I collect pop -up book so I would have passed this one up if I had been able to view it's entire contents. (There are 22 pages and only 5 pop-ups.) That being said... It is a beautifully put together book about dinosaurs. Probably best for ages 8 and up. There is quite a bit of information in it so younger readers may be overwhelmed or bored. A true dinosaur lover wouldl most likely love this as a gift.
