Synopsis

Walking around New York City was what Mitty Blake did best. He loved the city, and even after 9/11, he always felt safe. Mitty was a carefree guy “he didnâ€™t worry about terrorists or blackouts or grades or anything, which is why he was late getting started on his Advanced Bio report. Mitty does feel a little pressure to hand something in “if he doesnâ€™t, heâ€™ll be switched out of Advanced Bio, which would be unfortunate since Oliviaâ€™s in Advanced Bio. So he considers it good luck when he finds some old medical books in his familyâ€™s weekend house that focus on something he could write about. But when he discovers an old envelope with two scabs in one of the books, the report is no longer about the grade “itâ€™s about life and death. His own. This edge-of-your-seat thriller will leave you breathless. From the Hardcover edition.

Grade Level: 7 and up

Customer Reviews

This book takes place in New York City in present time. Mitty is a 15-year-old boy who thinks that life would be so much easier without school. The only reason that he makes himself go is Olivia. Mitty takes advanced biology, and he's not really sure why. His class is assigned to research a infectious disease using books as their textural references. If he does not make a good grade on

this test, he'll go back down to regular biology. Mitty would be fine with that, but it would mean not being in Olivia's class. So he decides to do the project. He chooses Variola Major, commonly called smallpox. While researching, Mitty comes upon an envelope stuck in between the pages of a disease book. When he opens it he finds several, what he believes were once smallpox scabs from a 1920 epidemic. As Mitty is writing his paper, he describes what smallpox does to your body. I recommend not reading these parts on a stop-and-go bus ride on the way to school, it only makes it worse. At the end of the chapters, the author tries to scare you by implying that the scabs had gone into his nose, and were affecting Mitty. He himself can not decide if he actually has this disease which he and the rest of the world thought no longer existed, or if he is simply imagining it. So, Mitty decides to email different medical committees and groups that he thinks he may have smallpox. These groups act in different ways, one person wants to buy the scabs, others think there's no way the virus could last that long, and another threatens to call the FBI for joking about a terrorist threat. Mitty tries to make himself believe that he doesn't have smallpox, but he can't help thinking he may cause a bioterrorist attack. It ends up that he thinks about killing himself, but actual terrorists kidnap him first.
