Customer Reviews

My little boy (2 years old) loves this book. He has for about a year and half. It has a wide variety of animals that are fun to look at. The pages are easy to turn because of the cut-out holes. I like the simple poem of Noah and God's blessing. I would say that for most books he will let me read it but this one, he would rather say the names of the animals and the sounds they make.

I've just begun my four month-old's book collection, and this was one of the first books I purchased. The story is minimal, but the detail of the illustrations is wonderful. I notice a new animal every time I look at it! My son stares in amazement at the pictures now and I'm sure he'll enjoy it more as he gets older. I think this book will really help him learn his animals; I can picture him when he's a toddler looking at the pictures and starting to point and name the animals. My only comment is that, since the story is so minimal, the book needs a lot of parental contributions, especially to increase the

Christian content.

I bought this for my son's 1st Birthday. He enjoys finding the cutouts on the page and flipping the pages. This is a well illustrated book w/ few words, which is perfect for a 1 yr. old! We point to the animals and say what they are and what noise they make. My son and I both enjoy this book.

I bought this book for my 2 year old son as interesting Christian-themed books were hard to come by. This book does have a Christian (biblical) theme, but fails to be interesting. My son and I have read lots of books with flaps or with holes cut out, and the best ones are the ones in which the hole/window leads to a new development in the story. The previous page might raise the question of what is behind the hole, the little picture in the hole gives you a clue, and when you turn the page, you find out what it is. This book does NOT do that. There is no progression of story as you flip the pages, you just see more levels of the ark. The holes allow you to peek at a different animal but the animal is not part of the story. All in all, there is nothing here to hold the child's (or adult's) interest. My son looked at the book once and hasn't touched it again. The pictures are bright and colorful, but otherwise this book is disappointing.

This is a jumbo board book filled with animal fun. It features vivid colors and die-cut doors and windows for peeking ahead and behind. Children can explore every level of the ark and dozens of different pairs of animals. The text is simple and short, only two rhyming verses on each two-page spread, leaving the focus on the crazy chaos that must have been. This book gives hardly any details, but it is a wonderful introduction to the biblical story of Noah inviting curiosity and sparking great interest in learning more. What I Like: The illustrations are friendly and full of activity. This book features many animals frequently neglected in the story of Noah. It shows more than just elephants, monkeys and lions; readers also find turkeys, yaks, pelicans, polar bears, flamingos, walrus and more! Every time I read this book to my children, it turns into a game of "can you find this animal" and "what sound does he make". It's wonderful for kids' curiosity and discovery. They also love poking their little fingers through the windows and doors and seeing what is in front and behind. The pages are super thick and sturdy. My copy has survived three years, two toddlers and thirty-six teeth to date. It's still holding strong. :) What I Dislike: There really is nothing that I dislike, however, this book does not give the complete story. There is no mention of why Noah and the animals are on a boat or Who put them there. It does mention the rainbow and say "God brought them back to land", but it fails to tell of the wonderful promise God made. While I very much like this book, it

definitely requires supplements to fill in the blanks -- be that a parent explaining further or another book on the subject. Overall Rating: Very Good Tanya -- Christian Children's Book Review

My son originally received this book as a gift from his Grandma, and loved the cut outs and looking at all the animals. Now his little sister is in love with it, and in fact looks at it all the time. She loves pointing out the "ani-mals" and mocking the sounds they make. I love how simple the words are, perfect for young children.

My 19 month old granddaughter can count to two, so this is perfect! His other books seem to hold her attention better (farm, pets, jungle animals) but I think it's because these pages have so many animals on them. As she gets a little older her grasp of the animals on the pages will be easier. The simplicity of the drawings are visually easy for her to identify. Am becoming a big fan of the Charles Reasoner books!

This book is only 6 pages long and each page probably has 2 short stanzas, but the artwork is great. My son is only 8 months old, but I can see when he gets older how much fun it will be finding all the different animals. The artwork is amazing, fun, and colorful. There are peep holes that go from one page to the next so that's a nice element too. And it explains the Noah's Ark story simply and without being "religious" preachy at all.
