Customer Reviews

We love this book as well as the others in the series. The illustrations are so colorful and beautifully done. So cute! My 1 and 3 year olds count them among their favorites for sure. They are a great size for popping into your purse or diaper bag to bring out at restaurants for entertaining busy little ones. They are also great for worship time as they are a perfect length and can be sung while looking at the adorable pictures. Great as gifts. Here are a few of the phrases from Jesus Loves the Little Children (besides the more common red, brown, yellow, black and white) sung to the same tune:Jesus loves the island children,On all the islands of the world.Climbing up the tallest tree,Finding shells beside the sea...Jesus loves the island children of the world.Jesus loves the small town children,In all the small town children of the world.Also:Jesus love the farm land children, desert children, cold land children, mountain children, city children and tropic children.This is one of the best books that I have purchased for my kids and their bookshelf is pretty full! You won't be disappointed.

I like that this book has the updated original verse with "Red, brown, (not "and") yellow, black and white." It seems to show one of each skin color on the first page with the verse. The other verses are about: farm land children (African culture), island children, desert children (Middle Eastern culture), cold land children (Scandinavian? Canadian?), mountain children (Central/South American), city children (multicultural city scene), tropic children, small town children (multicultural parade scene). It's a nice, sturdy board book that measures 5x5 inches.I'm glad this book has a different verse on each page. It introduces a young child to children who live and dress differently than they do, emphasizing that Jesus loves them all. It's a book that can span several years of your little one's life. As suggested in another review, sing one of any of the nine verse as your impatient new reader turns the pages. Children love repetition, but you won't be bored singing various verses. At the end of the verse/book, go back and point out the children you were singing about. Eventually as your child learns the verses and turns the pages more slowly, your child will sing with you and you can enjoy singing the entire book. Then your child will probably want you to be quiet while he/she "reads" it to you -- or another child.I purchased this off my granddaughter's wish list. Think I'll need to get one for my children's class at church!

This story goes to the tune of the familiar song, and shows children from a variety of cultures. It will give you more verses to sing to the song, and a basis for exposing your child to other ways of life.

We have the 3 books in this series and they are all fantastic. I find it harder to sing this one but my daughter doesn't mind that I speak the words. This book is my favorite as it covers lots of terrains on earth and features different cultures and sizes of populations (small town, city, island, mountain, tropics etc). Buy all 3. Your toddler will love them.

My daughter absolutely loves this book. We started reading/singing it to her when she was around 18 months old. It's now a year later, and she still asks to read this book. It's one of the few that she returns to and loves. The pictures provide lots for a little one to look at and process at different stages of development.PROS:Great for young childrenFun picturesReasonable priceCONS:I can't think of any

This pint-sized board book is great for little hands to grasp (some of the board books we have are a little too big for our baby to interact with well) and he is fascinated by the simple, crisp pictures. I like that, using a favorite children's song, we get to introduce our baby to different cultures and

geographical regions in a very basic, age-appropriate way.

Beautiful book that my children love! It doesn't read as the song goes - "red and yellow black and white". Instead it says, "red, brown, yellow, black and white." I really find that an unnecessary change, as the original song covers the basic colors and we are all variations of those colors.

I thought this would be a sentence of the well-known chorus on each page instead this author has written her own verses. They are not bad, but as a literacy professor what I know about the characteristics of young children who typically read board books is that they need one sentence, even one word per page, not verses. Too much text takes away from the enjoyment of what could have been a wonderful book to share.
