The Three R's: Reuse, Reduce, Recycle (What Do You Know About? Books)

Synopsis

Attractive color illustrations and easy-to-follow text combine to present factual information that younger boys and girls will readily absorb and understand. The Three R's: Reuse, Reduce, Recycle is one in a series of four entertaining What Do You Know About? books, for very young children. It describes the ways in which kids and their families can avoid waste and be environmentally conscious. Four pages presenting activities for children appear at the back of the book, followed by a two-page section for parents, with tips on explaining the subject in more detail.

Book Information

Age Range: 4 - 8 years

Lexile Measure: AD1030L (What's this?)

Series: What Do You Know About? Books

Paperback: 36 pages

Publisher: Barron's Educational Series (February 1, 2007)

Customer Reviews

If you're looking for a great resource book for Earth Day or to kick off your school's recycling program, I highly recommend "The Three R's: Reuse, Reduce, Recycle. With Kid friendly examples, simple text, and colorful illustrations it will communicate earth friendly messages to younger school age children. Team it up with "Michael Recycle" for a great environmental unit. Michael Recycle

Good book for introducing the concept of reuse, reduce, and recycle. I appreciated how the book avoided questionable science n technology and just focused on everyday lifestyle perspectives. The book does a good job of normalizing the sharing of second hand clothing and hand me downs

objects and that doing so is responsible. Overall this book gives an interactive starting place or springboard into further ecological curriculum. Side note: I want to make it clear that I am not a green radical and I do not own a solar panel or wind turbine.... I am a homemaker and scientist who just happens to know the real facts. The flat out truth is our society is so caught up in materialism and convenience that we are harming the earth at an unprecedented rate. Think of how many cities put all their trash on barges and dump it into the sea... Bury it in the ground.... Or burn it releasing the chemicals into the air. Think of how many chemicals go into making these items that are thrown away... Do we really want to eat those chemicals in our seafood, drink them in our water, or breathe them in? Green energies are not the solution to our problem. What we need is drastic societal changes to reduce, reuse, and recycle.

I'm a Daisy Scout leader and after we toured the county recycling center, we read this book and did a fun craft with plastic garbage bags (made "Plarn" bracelets). The girls were attentive and liked the story and imagery. They earned their 'Use Resources Wisely" petal from this and I might read it with my kids on Earth Day, too!

Great to teach 4 and 5 year olds about earth day and reusing, reducing and recycling!

This book was an excellent resource to keep my classroom engaged while learning about Earth Day. I teach primary SE, and this book was easy enough to be used as a read aloud. The illustrations also allowed those not yet able to access print, to do a picture walk and stay on topic. I'll keep this one.

Not short enough for three year olds, but explains process really well. More age appropriate for a four year old class.

I chose this book to read as part of our Reduce, Reuse, Recycle unit. It was very kid friendly and the children enjoyed the book.

I bought this book to teach my Kindergarten students about Earth Day/Recycling. It's a great way to explain the 3 ways to reduce, reuse, and recycle. Can't wait to read it again next year.
