Light (Eyewitness Guides)

Synopsis

This guide to the story of light in which photography of original equipment, intricate scientific instruments, revealing experiments and 3-D models offer a unique view to the incredible discoveries that have transformed our world. See why ancient peoples worshipped the Sun as a God; how light rays bend; why things glow when they are very hot; what creates a colour television picture; how microscopes and telescopes were invented ; why a leaf looks green; how fibre optics can transmit light; what happens during an eclipse; why images are reversed in mirrors; how a liquid crystal display works; what makes a hologram; what causes the eerie "will o' the wisp"; how do some animals make their own light; what creates a mirage; why we burn in strong sunlight; what a polarising filter does; why we see rainbows; what a quantum is and how X-rays penetrate our bodies.

Shipping Weight: 1.6 pounds

Average Customer Review: 5.0 out of 5 stars [See all reviews](#) (3 customer reviews)

Best Sellers Rank: #1,451,557 in Books (See Top 100 in Books) #3 in [Books > Children's Books > Science, Nature & How It Works > Light & Sound](#) #533 in [Books > Children's Books > Education & Reference > Science Studies > Physics](#) #134139 in [Books > Science & Math](#)

Customer Reviews

Picked out this book as a reference for a seventh grade science project on light absorbtion/heat. It had the information we were looking for along with great illustrations. Thank-you.

Great book for classroom experience, great for in school students for homeschool students. Lots of information in colorful pages with inviting graphics and details make it a great pick for any kid

I bought two. Fantastic book!
