IBM Powerha Systemmirror 7.1 For Aix

Synopsis

IBMÃ Â® PowerHATM SystemMirror 7.1 for AIXÃ Â® is a major product announcement for IBM in the high availability space for IBM Power SystemsTM Servers. This release now has a deeper integration between the IBM high availability solution and IBM AIX. It features integration with the IBM Systems Director, SAP Smart Assist and cache support, the IBM System StorageÃ Â® DS8000Ã Â® Global Mirror support, and support for Hitachi Storage.This IBM RedbooksÃ Â® publication contains information about the IBM PowerHA SystemMirror 7.1 release for AIX. This release includes fundamental changes, in particular departures from how the product has been managed in the past, which has necessitated this Redbooks publication.This Redbooks publication highlights the latest features of PowerHA SystemMirror 7.1 and explains how to plan for, install, and configure PowerHA with the Cluster Aware AIX component. It also introduces you to PowerHA SystemMirror Smart Assist for DB2Ã Â®. This book guides you through migration scenarios and demonstrates how to monitor, test, and troubleshoot PowerHA 7.1. In addition, it shows how to use IBM Systems Director for PowerHA 7.1 and how to install the IBM Systems Director Server and PowerHA SystemMirror plug-in. Plus, it explains how to perform disaster recovery using IBM DS8700 Global Mirror and Hitachi TrueCopy and Universal Replicator.This publication targets all technical professionals (consultants, IT architects, support staff, and IT specialists) who are responsible for delivering and implementing high availability solutions for their enterprise.

ISBN-10: 0738435120

ISBN-13: 978-0738435121

Product Dimensions: 1.2 x 7 x 9 inches

Shipping Weight: 2 pounds (View shipping rates and policies)

Average Customer Review: 5.0 out of 5 starsÂ Â See all reviewsÂ (1 customer review)

Best Sellers Rank: #11,032,896 in Books (See Top 100 in Books)   #40 inÂ Books > Computers & Technology > Operating Systems > Unix > AIX

Customer Reviews

PowerHA is always threatening to go away; however there is not another mature replacement. Most IBM users will come to the point where they need it.It is a good idea to have this book before you

need the system so you can do some strategic planning.Once you start to apply PowerHA you will not want to make assumptions that can cost time and money to correct. You can also paint you self in a corner if you do not watch out.The biggest mistake PowerHA systems people make is why this book is so important. It is called preventative maintenance. People thing if it is not broken do not fix it. However this is like any other electronic stem and needs to be periodical updated or thrown away. The user does not want to find him/her self saying "But it has worked until now" or "the other system is the same and it works".
