# Dinosaurs, Dinosaurs

## Synopsis

From beloved author/illustrator Byron Barton comes this classic picture book about all the different kinds of dinosaurs that come in all different shapes and sizes. With a masterful use of color, shape and composition, Barton brings to life a unique and endearing vision of what the world may have looked like once upon a time when these beasts still roamed the earth. Supports the Common Core State Standards.

## Book Information

Age Range: 4 - 8 years

Lexile Measure: 720 (What's this?)

Paperback: 40 pages

Publisher: HarperCollins; Reprint edition (April 30, 1993)

Language: English

ISBN-10: 006443298X

ISBN-13: 978-0064432986

Product Dimensions: 10 x 8.8 inches

Shipping Weight: 7 ounces (View shipping rates and policies)

Average Customer Review: 4.5 out of 5 stars [See all reviews](#) (35 customer reviews)

Best Sellers Rank: #443,086 in Books (See Top 100 in Books) #54 in [Books > Children's Books > Education & Reference > History > Prehistoric](#) #171 in [Books > Children's Books > Education & Reference > History > Exploration & Discovery](#) #654 in [Books > Children's Books > Animals > Dinosaurs](#)

## Customer Reviews

This book is a must have for reading time. My one year old boy has loved it since birth (well almost birth)! He really likes the part about "Long sharp claws and long sharp teeth!" It brings the house down. Yet, it still ends with a sleepy touch. Get it... or regret it!

It is a good book and I enjoyed the book a lot and I liked the pictures. This book can tell you about dinosaurs and what their different body parts are called. Some of them ate meat and some of them ate plants. The dinosaurs lived a long time ago.

My 2 yr. old son loves dinosaurs and we got this book at our library. Practically every page was ripped (seemingly by the hands of other dino-loving toddlers) and mended with strips of tape. I am

dreading the return of this book to our library so I am purchasing it for a low price here. It has simple & bright pictures and short text for short attention spans. It even ends with "sleepy dinosaurs" with their eyes closed for that perfect segway to bedtime!

Dinosaurs, Dinosaurs is, at the moment, my baby's favorite book. I spread a different set of four books out on the floor in front of her every morning, and she always chooses this one first if it's there. She turns the pages herself, and seems to favor kentrosaurus (orange dinosaur with spikes) and tyrannosaurus rex (dinosaur with long, sharp claws and long, sharp teeth). It's really fun to see! Dinosaurs, Dinosaurs is also one of my favorite baby books. I love Byron Barton's illustration style with big, bold colors, and I like his simple writing style, too. I also get a kick out of the fact that a volcano erupts every time T-Rex comes on the scene. I guess he's just that awesome. This set of board books (I have a lot from Byron Barton, including: Boats, Planes, Machines at Work, and Trains) stands up very well to its exposure to a teething, drooling baby who still spits up on her books regularly and is determined to turn the pages for herself -- enthusiastically. That is to say, we abuse -- I mean, read -- this book daily, and it's still in quite good shape. A little wear and tear at the edges of the pages where the gumming has been particularly vigorous, but otherwise fine. My only lament about this book, and board books in general, is that they are nearly always abridged. I have the paperback version of this book, too, and it has some extra pages in it, including triceratops mommy laying her eggs and the pachycephalosaurs head-butting it out. Without the battle of the bony-headed dinosaurs, the pachycephalosaur on the last page of the book seems like an afterthought. Oh well. I still love this book, and Elsie just has something to look forward to when she's big enough for paper books (if Dinosaurs Dinosaurs is still a favorite by then).

I bought this based on reviews for a "4s" classroom read-aloud for my child's in-class birthday celebration. It was a yawner. Okay, very cute but WAY too simplistic and short versus what I expected. It is truly board-book quality and quantity material. Ma 3-5 words per page. In fact, it has less content than your average Boynton board book. Anyway, perfect for what it is but, if you're looking for Pre-K or K readers, keep looking. Younger targets readers will also like Bones, Bones, Dinosaur Bones. Fun!

This book is really wonderful and colorful. It's one of my son's absolute favorites. The 'plot' is pretty straightforward, just describing the different types of dinosaurs (i. e. dinosaurs with horns, dinosaurs with sails on their backs, scared dinosaurs, hungry dinosaurs, etc). If you read every line with

emotional flare, it becomes very dramatic. It has the names and pictures of the dinosaurs in the back, so it's educational as well as entertaining. My son also likes pointing to all the different objects in the book - the water, the sun and stars and trees, so we spend some time talking about every page. And board books are really wonderful because he can turn the pages himself without tearing the book apart.

My nephew is getting to the dinosaur age so among other things for his birthday he received this book, a jumbo growing dinosaur egg and some dinosaur bath bombs - he loved them all. He's three and even though I thought the book was a little young for him seeing he is a smart cookie, he still enjoyed it.

This is my son's favorite, and mine too! Although he's only six months old, I've been reading to him almost every day since he was old enough to pay attention, and he has loved this book from the word go - probably because of the bright colors and simple shapes, but maybe also because when I read it to him it's fun to make "dinosaur noises" and roars, which he finds very entertaining. Although I have read this book so often that I have literally memorized it, I'm not tired of it yet, and that's about as high a recommendation for a baby book as I can make!
