Half-Blood Prince is easily one of the better books in the Harry Potter series, though each is a masterpiece. But the 6th installment of a 7-part series is bound to be full of great moments in the story. There remains a great deal unanswered in this book, however, and the 7th will surely need to be no smaller than an average encyclopedia. Somehow as I was reading this book, I felt that I was learning more and at a quicker rate than in Order of the Phoenix, but so many of Harry's problems and questions took so long to reach any sort of answer or resolution that I still ended up not knowing many of the secrets I expected to be revealed in this book. It must be that Rowling, in her grand scheme, is saving much for the last book. One thing seems to be for certain, though, and that is that

Rowling will never lose that special touch, that supreme and genuine interest in the story and its characters that makes the writing so engrossing. After completing this book, I was in a state of total shock and to this moment I wish only to read the seventh book. Half-Blood Prince is dark; I mean far darker than the last. This is the time I have always known was inevitable in the Harry Potter world, at last we are seeing chaos and war and battles break out within the walls of Hogwarts itself.

Several of the chapters are particularly well-written, with great suspense and imagery; an example would be the time Harry and Dumbledore spent in the cave. Relationships blossom in this book at last, including Harry suddenly falling in 'love' with Ginny Weasley, Ron dating Lavender Brown, Pansy and Draco clearly going out, and some serious hinting at a possible romance between Ron and Hermione when he gets rid of Lavender.

I've just finished reading the latest installment of the Harry Potter chronicles. My chest feels as though my heart has been torn out from the book's tragic ending as I sit here typing, hopelessly admiring the tactic Rowling used to achieve her greatest success to date in this much loved children's book series. Children and adults who read this book alike will be left reeling in its aftermath. As an adult I was first attracted to the Harry Potter series quite inadvertently. I had adamantly refused to read any of the three Harry Potter books published at the time until I was required to in college in my children's literature class. Almost instantly I was spellbound by Rowling's nostalgic narrative. Children of course (and quite a few adults as well) delighted in the fantasy and Harry's and friends' magical misadventures. However, I think much more alluring to adults is how Rowling's writing somehow manages to transport us in time to a much simpler, secure, and magical era in our own lives. But in her latest achievement Rowling departed from her usual safe, magical, nostalgic atmosphere, instead embracing all too real themes prominent in the world at large. The opening chapter in her book portrays the muggle world hopelessly searching for answers to inexplicable acts of terrorism. In doing so, she has effectively raised the stakes in this book. No longer is it just the wizarding community in danger, but ours as well. It seems the ever present daily fear that magical characters live with is a very familiar echo of our own terrorist fueled anxiety in this perilous new world we live in. Gone is mystery obscuring Voldemort, who until this book, moved quietly (with a few notable exceptions) in the shadows of uncertainty and doubt.

I'm one of those who couldn't wait until the morning to get hold of this book. I literally battled rain and cold weather with my sister to get our copies at 12.15 am, July 16, in a local bookstore in Argentina. According to my dad, I'm slightly nuts for doing that :) In my opinion, though, this book

was well-worth the extra effort. After picking it up, I returned to my house and started to read it. I just finished it, and I can sincerely say that it is simply outstandingly good. Yes, the other books were awesome too, specially the 4th and the 5th, but I think that Harry's world is becoming more defined with each book, and that makes for a thoroughly engaging reading experience. What is new in this book?. Well, after having to come to face with the fact that Lord Voldemort is alive, the wizard community is in an uproar, and quite frightened. Cornelius Fudge has been sacked as Minister of Magic, and an Auror has been named in that position. Harry, Ron and Hermione get their O.W.Ls (Ordinary Wizardry Levels), and have to decide what courses to take for their N.E.W.Ts (Nastily Exhausting Wizarding Tests), something that will define their future careers. Plots abound, and danger is omnipresent throughout the book. There is a new teacher of Defense against the Dark Arts, and also an eccentric new Potions' teacher. Of course, there is much more, including a death that I bet will make you cry, and that hurts Harry enormously. I won't tell you who dies, only that the event involves the Half-Blood Prince, and that I think it was a sacrifice rather than a murder. But what's the point of telling you all this if you can read the book, and enjoy it as much as I did?. Suffice it to say that this is a worthy addition to the Harry Potter series.
