## Customer Reviews

We took this one out of the library so many times we finally decided to just buy it. Makes dinosaurs seem alive and lifelike without being too scary, which is just what my little guy wants. Too many dinosaur books and toys are all about the scariness of the predators, which frightens some kids, especially if read at bedtime. Others make them cutesy and cuddly, which I'm pretty sure they were not! This one is nice, but not boring (there is a predator attack, it is just not made to be too gory or scary), and the pictures are lovely, too.

This colorful, imaginative book is a wonderfully creative work for young dinosaur admirers. My son is passionate about dinosaurs and loves this book. It is often his first choice for bedtime reading. The author and illustrator are well-matched and provide fast moving text, vivid pictures and a story line that a child can relate to and let his imagination run wild with, "I am an Ankylosaurus. Look into my eyes and see what I see...."
