Bug Advocacy is the term Kaner uses to describe the purpose of writing bug reports: to advocate for

a bug to be fixed by writing clear, concise and persuasive bug reports. BBST Bug Advocacy is probably my favorite course material and is certainly the most practical. Anyone who deals with software (personally and professionally) has either written or considered writing a bug report. For those of us that deal with bugs professionally (or deal with software as a profession) the value of well written bug reports is immense. Well written bug reports can be the difference of getting a fix in quickly and accurately vs a fix that never comes. In other words well written bug reports have a direct impact on quality. It's not about who files the most bugs, it's about who gets the most bugs fixed. This is the material to help you do that. This book is a great companion if you take the online classes or if you just want to learn at your own pace. I keep a copy as a reference for the great material.
