# Programming Internet Applications With Delphi 32

## Book Information

Paperback: 700 pages

Publisher: Sams Publishing; Pap/Com edition (December 1996)

Language: English

ISBN-10: 1575210606

ISBN-13: 978-1575210605

Shipping Weight: 1.1 pounds

Average Customer Review: 3.0 out of 5 stars [See all reviews](#) (1 customer review)

Best Sellers Rank: #16,890,813 in Books (See Top 100 in Books) #59 in [Books > Computers & Technology > Programming > Languages & Tools > DHTML](#) #59 in [Books > Computers & Technology > Programming > Languages & Tools > Delphi](#) #216 in [Books > Computers & Technology > Programming > Languages & Tools > Borland Delphi](#)

## Customer Reviews

I have been using this book for 9 months. I don't use the winsock code because there are higher level OCX controls to do the job. The real value of this book is in the theory. Don't go searching for those long RFCs. Appendix A and B has become my bible for the SMTP and NNTP protocols. The scenarios presented in the examples throughout the book, helped me understand the stages of a session between the server and client. You won't get too much Delphi-specific info but as long as the various TCP/IP protocols are in use, this book is a classic.
