With 48 pages of step-by-step instructions and colorful illustrations, the book compares in price to other similar about gardening written for children. The medium-sized book measures 7.8 by 0.3 by 9.7 inches. I would definitely pay the current price, which I rate very positively. Recommended for readers between the ages of 7 and 10 in second through fifth grade, *Let's Garden: A Step by Step Introduction* is a DIY

book full of great gardening ideas that do not require sophisticated equipment or a large yard. I agree that the text is appropriate for the recommended age range. My daughter is four-and-a-half-years-old and is reading at a first grade level. She can already read much of the book with only a little bit of help. The eleven chapters are filled with gardening ideas, crafts, games, information, tips, recipes, and more. My daughter wants to do all the activities. I plan to continue referencing Let's Garden with my children for many years to come. The illustrations in Let's Garden: A Step by Step Introduction are a mix of photographs and drawings. The photographs are quite eye-catching and inspiring. For example, I love feeding the birds that live around my home, and I have been considering making my own suet feeders. The photo that accompanies the recipe for bird food in the book is so pretty that I really want to try making my own. The drawings help illustrate the text perfectly so that young readers can better understand the concepts explained throughout the book. I received a copy of this book in exchange for my honest opinion.
